

## **Part 2- Practical**

The practical will involve the development, design and creation of a database for an information system. The database will consist of the following and you will print out a hardcopy of each as well and hand in with your written report.

Printouts from your electronic database attached to your report will included:

1. Table
  - a) minimum of 1 table, 25 records, at least 6 fields
  - b) print the table
  - c) can be flat file or relational
2. Queries
  - a. develop a minimum of five queries
  - b. print queries
  - c. queries must be complex and not just single queries
3. Form
  - a. develop two form sheets
  - b. print the first record of the form
  - c. must be different and show different information
4. Report
  - a. develop two report format
  - b. print the report
  - c. must be different and show different reports

### **Handed in with your report will include:**

1. Written report with all the relevant sections
2. Database print outs
3. Update and revised Gantt chart on Part B
4. Journal/Diary of the progress of the project

The project must be word processed and in with your practical
